

Pads - n - Frame Air Filtration System

The A+2000 Air Filtration System consists of a permanent frame and MERV 8 anti-microbial filtration inserts.

PERMANENT FRAME

- **ONE-TIME PURCHASE** - Unconditional warranty for the lifetime of the original purchaser.
- **DURABLE** - Constructed of space age plastics. Resistant to corrosion, oxidation and deterioration.
- ***MOVING?** - Manufacturer will re-size/replace frame when moving to a new location requiring a different size frame.
- **EASILY INSTALLED** - Simply remove old filter and replace with the permanent frame.
- **AVAILABILITY** - Custom sizes available at no additional cost.

Filtration for Life!

FILTRATION INSERTS

- **CONVENIENT** - Forget the aggravation and expense of traveling to a retail outlet to purchase your air filters. An annual or semi-annual supply of filtration inserts is included in your initial order. With the automatic re-order option you will receive a supply of your chosen inserts. You will never be without a clean air filter again.
- **EFFICIENT** - More efficient at capturing particles, such as dust, ragweed, pollen, etc., from the air stream, than standard furnace filters purchased at retail outlets.
- **ANTI-MICROBIAL** - Air filters have been identified as a prime breeding ground for many types of microorganisms due to the surface area, nutrients, temperatures and moisture they provide for reproduction and survival. Anti-microbial agents are effective in reduction of a broad range of microorganisms - including molds, mildew, fungi, yeasts and gram positive and gram negative bacteria.
- **ECONOMICAL** - Studies show that disposable inserts and permanent frames are the most economical way to filter air.
- **EASILY STORED** - A+2000 filtration inserts are shipped in an easily stored packet.
- **EASY DISPOSAL** - Can be disposed of in a trash compactor or trash receptacle.

**A resizing fee will be assessed for filters under the moving warranty*
